

## BAILIWICK OF GUERNSEY LAW ENFORCEMENT

**25<sup>th</sup> March 2020**

End of the day roundup

In short, it has been absolutely fine.

As shown in the photos throughout, people really are not out. And that's fantastic, we're really grateful to everyone for listening to the message and staying home.

This instruction was made to protect our community and by adhering to it, you're saving lives.

A few of the scenarios we have come across today have a similar thread, so we just want to reiterate that you can only go out under certain circumstances. The advice is attached.

When you do go out, remember your social distancing and don't accidentally end up congregating with people who aren't part of your household. We get it, it's perfectly normal to go up to your friends when you see them out and have a chat. But we don't live in normal times - so keep your distance from those you don't share a house with.

Also, don't call JESCC asking whether you can go to work - they're not there for that. For Coronavirus clinical questions: 756938 or 756969 and non-clinical questions: 717118 or [covid19enquiries@gov.gg](mailto:covid19enquiries@gov.gg)

Oh and, absolutely don't forget to wash your hands when you get home for at least 20 seconds with warm, soapy water. In fact, do that throughout the day.

Thanks again everyone - let's tackle day two with the same community spirit.

Remember: we're in this together, not in it for ourselves.
